Enthusiastic **AI & Data Science** student with strong programming fundamentals and hands-on experience in Arduino-based hardware and IoT projects.

EDUCATION

B.Tech – Artificial Intelligence & Data Science

VSB College of Engineering | Expected 2028

HSC (12th Grade) – T.A.R.C.H.S.S| 78.83% | 2024

SSLC (10th Grade) – Corporation high school |76.6% | 2022

SKILLS

- Python, Java, HTML, CSS, JavaScript
- Data Structures & Algorithms (NPTEL Certified)
- Arduino hardware prototyping & IoT basics
- Strong English communication

CERTIFICATIONS

- NPTEL – introduction to internet of things

PROJECTS

Automated Plant Watering System – Arduino Uno & moisture sensors for automatic irrigation.

Ultrasonic Door Automation – Contactless door opening using Arduino Nano and ultrasonic sensor.

Remote-Control Car (100m Range) – Arduino-based vehicle with wireless control and DC motors.

STRENGTHS

- Strong problem-solving mindset
- Quick learner with hands-on electronics & coding skills
- Adaptable to new technologies
